Indian Forest Records (New Series) Entomology. Vol. 8 No.2. Indian Longicorn Beetles (Coleoptera Cerambycidae). Part I

1950

Summary

Press Dehrab DunFOREWORD This is the first part of a series of systematic papers on Indian Longicorn beetles (Coleoptera : Cerambycidae) based on the entomological collections of the Forest Research Institute Dehra Dun which were sent to Dr. [.] This point is worth the mention because in the remote and recent past the invariable practice with the British entomologists at the Forest Research Institute had been to deposit type-specimens in the British Museum (Natural History) London. [.] All that has changed with India's independence and we now make it a point to retain all type-specimens and uniques in the country for our national collections of which so far as entomology is concerned there are three namely (i) the Zoological Survey of India Indian Museum Calcutta (ii) Indian Agricultural Research Institute New Delhi and (iii) Forest Research Institute Dehra Dun. [.] In the number of type-specimens the first named is richer than the others but we are hoping by our revised policy to make the Forest Research Institute an important centre for type collections of insects M. L. Robinson Forest Entomologist 9th Dec mber 1949. [.] The following notes and descriptions are based largely on specimens submitted for study from the Forest Research institute Dehra Dun U. P. They are from various parts of India and Burma.
